ABOUT ME:

Systems Engineer who loves code, good practices and is a true believer in teamwork.

Since 2020 I started with FRONTEND development with three years of experience in languages such as HTML5, CSS3 and JAVASCRIPT using frameworks and libraries such as ANGULAR and REACT, as well as BOOTSTAP and TAILWIND.

In 2023 I began to discover PYTHON 3 and its FASTAPI web framework. I am also getting to know NODE JS with the EXPRESS JS framework, which motivates me to be constantly learning.

Andres F. Orozco

SYSTEMS ENGINEER
