## ABOUT ME

Systems Engineer who loves code and good practices. Since 2020 I started in FRONTEND development with three years of experience in languages such as HTML5, CSS3 and JAVASCRIPT using frameworks and libraries such as ANGULAR and REACT, as well as BOOTSTAP and TAILWIND. In 2023 I began to discover Python 3 and its FastAPI web framework, which motivates me to be constantly learning and a true believer in teamwork.

## LANGUAGES

Spanish: Native

English: Intermediate
