ABOUT ME

Systems Engineer who loves code and good practices, since 2020 I started in Frontend development with two years of experience in languages such as HTML5, CSS3 and JavaScript, using frameworks and libraries such as Angular, React and Bootstrap. In 2023 I started to discover Python 3 and its FastAPI web framework, which motivates me to be a constant learner and a true believer in teamwork.

LANGUAGES

Spanish: Native

English: Intermediate
